

Child Passenger Safety

Did you know?

Traffic crashes are the leading killer of kids. Studies show more than 60% of children killed in crashes are unrestrained and more than 80% of children in safety seats are incorrectly restrained (National Safety Council). Below is a list of free services to have your child's safety seat checked for proper installation and usage by a child passenger safety specialist.

Please note: it may take several weeks to schedule a safety seat inspection appointment. To find more information and locations, visit seatcheck.org.

Organization	Contact Department/Person	Address/website	Phone number
