What is Chronic Care Management (CCM)?

Medicare encourages people with long-term health concerns or issues to participate in a CCM program that can help improve overall health and decrease medical costs.

What is Wellbox CCM?

Wellbox CCM is a service offered by your doctor that provides you at least 20 minutes of care management services outside of your regular office visits.

The care management services occur via phone call, digital communication or mail. They do not require you to go into the doctor's office. Your privacy in all these exchanges is secure in compliance with the Health Insurance Portability and Accountability Act (HIPAA).

Why should I participate?

Wellbox CCM has shown a very positive impact on the health of people just like you—including fewer emergency visits and hospitalizations. The program is built to prevent future health concerns through education and awareness with the goal of keeping you healthier, longer with more consistent check-ins.

Who will I be talking with? What will we talk about?

The doctors and nurses in the office are primarily focused on helping people with office appointments. They have partnered with Wellbox to provide the same level of care for people who would be helped from a little extra care.

Our team of registered nurses are available during standard business hours to handle your care management. As an extension of your doctor's office, Wellbox and your doctor communicate with each other to make sure you receive the very best care. Discussions and patient education mailings may include:

- Your wellness goals and objectives
- Your medications and prescriptions
- Available preventative services
- Available social services and local resources
- Care coordination among your providers

You are also always able to ask your nurse questions or bring up your own concerns.

Does it cost anything to participate?

Once the patient deductible is met, Medicare Part B covers this service at 80%, just as they would cover any face-to-face visit in the office.

Most supplemental policies cover the remaining cost. For those with participating secondary insurance policies, once the Medicare deductible is met, this program is available at no cost.

Patients without a supplemental policy, or who have a secondary insurance policy that does not cover CCM, would be billed their 20% coinsurance cost.

How do I enroll?

Simply call Wellbox at 1.844.602.1690 and a dedicated enrollment specialists will answer any questions you may have and enroll you in the program. Once you are enrolled, a registered nurse will review your medical history so they are well prepared for your first conversation.
