Dignity Health St. John’s Regional Medical Center

Community Benefit 2016 Report and 2017 Plan
A message from

Darren Lee, president and CEO of Dignity Health St. John’s Regional Medical Center, and Carl Wesley, Chair of the Dignity Health Ventura County Community Board.

Dignity Health’s comprehensive approach to community health improvement aims to address significant health needs identified in the Community Health Needs Assessments that we conduct with community input, including from the local public health department. Our multi-pronged initiatives to improve community health include financial assistance for those unable to afford medically necessary care, a range prevention and health improvement programs conducted by the hospital and with community partners, and investing in efforts that address social determinants of health.

Dignity Health St. John’s Regional Medical Center (DHSJRMC) shares a commitment to improve the health of our community, and delivers programs and services to achieve that goal. The Community Benefit 2016 Report and 2017 Plan describes much of this work. This report meets requirements in California state law (Senate Bill 697) that not-for-profit hospitals produce an annual community benefit report and plan. Dignity Health produces these reports and plans for all of its hospitals, including those in Arizona and Nevada. We are proud of the outstanding programs, services and other community benefits our hospital delivers, and are pleased to report to our community.

In fiscal year 2016 (FY16), DHSJRMC provided $33,247,822 in patient financial assistance, unreimbursed costs of Medicaid, community health improvement services, and other community benefits. Including the unreimbursed costs of caring for patients covered by Medicare, the hospital’s total community benefit expense was $64,255,557.

Dignity Health’s St. John’s Regional Medical Center Board of Directors reviewed, approved and adopted the Community Benefit 2016 Report and 2017 Plan at its October 26th, 2016 meeting.

Thank you for taking the time to review our report and plan. If you have any questions, please contact us at 805-988-2688

EXECUTIVE SUMMARY –

- Though the communities served includes all of Ventura County and some of the northern coastal areas of Los Angeles County, the Primary Service Area of Dignity Health St. John’s Regional Medical Center (SJRMC) includes Oxnard Zip codes 93030, 93033, 93036, 930419. This represents a population of 243,088.

- The significant community health needs that form the FY16 report aspects of this document were identified in the SJRMC’s 2013 Community Health Needs Assessment (CHNA), which is publicly available at www.dignityhealth.org/stjohnsregional/document/community-benefit-reports/2013-chna. Additional detail about identified needs, data collected, community input obtained, and prioritization methods used can be found in the CHNA report. The significant community health needs identified in 2013 for this report were:
  
  o Diverse needs from a diverse population.
  o Lack of Financial Resources (especially Poverty) as it affects Access to Health care
  o Chronic Disease, including: diabetes, heart diseases, respiratory diseases and cancer.
  o Obesity especially among adolescents in terms of both current and future impact to health of the community.
  o Mental Health Services in terms of resources and access.
  o Environmental issues impacting health.

- In FY16, Dignity Health St. John’s Regional Medical Center (SJRMC) took numerous actions to help address identified needs. These included: Senior Wellness Program, Living Well with Diabetes Program, Congestive Heart Active Management Program (CHAMP®), Health Ministries Basic Needs Programs, Dignity Health Community Grants Program, and Shots for Kids & Adults Immunization Program, Chronic Disease Self-Management Education Program (Stanford model) in addition to activities whose outcomes are difficult to quantify.

- For the FY17 plan elements of this report, the hospital plans to modify its programs in light the community health needs identified in St. John’s 2016 Community Health Needs Assessment (2016 CHNA), which may be found at www.dignityhealth.org/stjohnsregional/document/community-benefit-reports/2016-chna. The needs identified in the 2016 CHNA are:
  
  o Obesity & Overweight
  o Access to Healthcare
  o Homeless Health Issues
  o Lack of Mental Health Resources
  o Diabetes & Prediabetes
  o Cardiovascular Health
  o Cancers
  o Social Determinants of poor health
• The economic value of community benefit provided by SJRMC in FY16 was $33,247,822, excluding unpaid costs of Medicare in the amount of $31,007,735.

• This document is publicly available at www.dignityhealth.org/community-benefits-reports. This report will also be disseminated to SJRMC Board and Foundation members, employees, physicians and at public health events.

• Written comments on this report can be submitted to SJRMC Vice President of Mission Integration or by e-mail to george.west@dignityhealth.org., or by call 805-988-2725.
MISSION, VISION AND VALUES

Our Mission

We are committed to furthering the healing ministry of Jesus. We dedicate our resources to:

- Delivering compassionate, high-quality, affordable health services;
- Serving and advocating for our sisters and brothers who are poor and disenfranchised; and
- Partnering with others in the community to improve the quality of life.

Our Vision

A vibrant, national health care system known for service, chosen for clinical excellence, standing in partnership with patients, employees, and physicians to improve the health of all communities served.

Our Values

Dignity Health is committed to providing high-quality, affordable healthcare to the communities we serve. Above all else we value:

Dignity - Respecting the inherent value and worth of each person.

Collaboration - Working together with people who support common values and vision to achieve shared goals.

Justice - Advocating for social change and acting in ways that promote respect for all persons.

Stewardship - Cultivating the resources entrusted to us to promote healing and wholeness.

Excellence - Exceeding expectations through teamwork and innovation.

Hello humankindness

After more than a century of experience, we’ve learned that modern medicine is more effective when it’s delivered with compassion. Stress levels go down. People heal faster. They have more confidence in their health care professionals. We are successful because we know that the word “care” is what makes health care work. At Dignity Health, we unleash the healing power of humanity through the work we do every day, in the hospital and in the community.

Hello humankindness tells people what we stand for: health care with humanity at its core. Through our common humanity as a healing tool, we can make a true difference, one person at a time.
OUR HEALTH CARE CENTER AND OUR COMMITMENT

The Sisters of Mercy, at the invitation of community leaders who discerned a community need for a hospital in the Oxnard coastal plane, established St. John’s in 1912 as a six-room wooden structure. It grew to be St. John’s Regional Medical Center (SJRMC) a 265-bed facility on a 48-acre campus in northeast Oxnard, serving a community that has a land use mix of residential, agricultural and industrial, including a large Navy base and a vacation harbor area. SJRMC offers comprehensive medical programs and services, including emergency care, acute physical rehabilitation, cardiac care, cancer care, maternity and childbirth services (including a Neonatal Intensive Care Unit), and neurology. Accredited by The Joint Commission with additional certifications as a Chest Pain Center and a Stroke Center, it is also serves as home to St. John’s Cancer Center of Ventura County, and St. John’s Center Surgical Weight Loss Center. St. John’s Hospitals have the only 24/7 Critical Care Intensivist Physician program in Ventura County. SJRMC is Joint Commission certified for Bariatrics Surgery, Cardiac Care and Stroke Care. SJC is rated by Healthgrades to be among the top 100 hospitals in the USA.

Rooted in in the Sisters of Mercy heritage as carried forward by Dignity Health’s mission, vision and values, St. John’s Regional Medical Center is dedicated to improving community health and delivering community benefit with the engagement of its management team, Community Board, staff, physicians and volunteers.

The board and committee are composed of community members who provide oversight and direction for the hospital as a community resource. SJRMC continues the Sisters of Mercy heritage of healing and community service in the Catholic social tradition with a commitment to meet the health care needs of the community, seeking to address not only ill-health but the underlying socioeconomic conditions that exacerbate healthcare disparities. This is done through multiple programs tailored to an identified need and collaborations with other community organizations.

The Chair of the Community Board also serves as Chair for the Healthy Communities Committee of the Board. That committee is composed of Community Board members, Foundation Board members and interested community members. As a group, they oversee the CHNA process and review that document, oversee and contribute to strategies for meeting the identified health needs of the community, and overseeing programmatic outcomes in addition to seeking additional resources, exploring potential collaborations and identifying opportunities. This includes, but is not limited to, review of the triennial Implementation Strategy, the annual Community Benefits Report and Plan, monitoring on a monthly basis reports of programs offered by SJRMC and dialoguing with community health program leaders and Executive leadership. Appendix A includes a roster of board and committee members, with affiliations.

The key staff members of SJRMC who are responsible for and dedicated to planning and carrying out the community benefit program include:

- George West, Vice President Mission Integration who is the executive leader accountable for all community health programs;
- Sr. Suzanne Soppe RSM, Sister Sponsor and Lead Community Health Educator, who in addition to educating community members provides continuity and Sister Sponsor oversite of the
community education and outreach activities. Sr. Soppe has been instrumental in the successful launch of DEEP®;

- Gabriel Guillen RN, Supervisor Community Health Education Dept. who is responsible for Community Health Education programs/classes, health fairs/screenings, CHAMP® and the immunization program.

- Lydia Kreil, Supervisor, Health Ministries Dept. and Healthy Beginnings Program, manages the outreach activities that address the social determinants of poor health. These include the community food pantry, community clothes closet, basic needs fund & counseling. Ms. Kreil is also responsible for tracking and reporting Community Benefits.

- Alicia Zaragoza RN, manager of the St. John’s Cancer Center of Ventura County, is responsible for the daily activities of the Cancer Center including support groups, classes, lectures, symposia and is the Cancer Nurse Navigator.

- Amanda Tamburro, Construction Project Manager, Dignity Health Central Coast Service Area

SJRMC’s community benefit program includes financial assistance provided to those who are unable to pay the cost of medically necessary care, unreimbursed costs of Medicaid, subsidized health services that meet a community need, and community health improvement services. Our community benefit also includes monetary grants we provide to not-for-profit organizations that are working together to improve health on significant needs identified in our Community Health Needs Assessment. Many of these programs and initiatives are described in this report.

In addition, Dignity Health System has a long history of investing in community capacity to improve health, especially with regards to affordable housing as a social determinant of health, through Dignity Health’s Community Investment Program. These efforts include the following housing projects:

- With the Sisters of Mercy through Mercy Housing:
  - Casa San Juan, Oxnard
  - Casa Merced, Oxnard

- With Cabrillo Economic Development Corp.:
  - Rodney Fernandez Gardens, Santa Paula
  - Valle Naranjal Farmworker Family Apartments, Piru
DESCRIPTION OF THE COMMUNITY SERVED

Community is defined as the resident population within the hospital’s service area. While Dignity Health St. John’s Regional Medical Center serves all of Ventura County, the hospital is located in and serves primarily Oxnard. Oxnard is a suburban community located in the west end of Ventura County. Oxnard had a mixed economy with significant agricultural and industrial elements, a high-tech sector, a commercial harbor, a beach area that attracts vacationers, a large recreational harbor and an active Navy base with an air station. SJRMC’s Primary Service Area (PSA) was determined by analysis of the highest percent of discharges from the hospital for the year. SJRMC’s Community is therefore determined to be the people residing in the zip codes of Oxnard 93030, 93033, 93035, Port Hueneme 93041. The Secondary Service Area is Camarillo 93010 and 93012. As part of our commitment to mission in raising the common good and improving the quality of life for our communities, SJRMC not only focuses on the needs of its PSA but also takes into account the needs throughout Ventura County.

The PSA for SJRMC is unique to Ventura County. Comprising approximately 10% of the population of Ventura County, it is significantly higher in terms of those who are over 60 years of age and more than two-thirds of the population who identify themselves as white non-Latino. The level of education is relatively high with a fairly low unemployment rate (not including the many retirees), with English as the primary language spoken at home (data provided from the US Census).

Community Demographics
- Total Population – the population for Ventura County is 835,981, with 243,088 in the PSA.
- Age Groups – 30.9% of the population is under the age of 18 with 18.1% over the age of 60.
- Gender Diversity – 50.4% of the population is female, 49.6% male.
- Race/Ethnic Diversity – 65.2% of the population self identifies as Latino, 23.2% Non-Latino Caucasian, 7.1% Asian, 2.3% Black and all others comprise .2%
- Adult Education – 30.6% do not have a High School Diploma.
- Poverty Status – the poverty rate for the service area is 14.6% with some areas of Oxnard at 18%.
- Unemployment – among the cities in the service area, the unemployment rate is 7.6%.
- Income – median household income in 2013 was $63,810.
- Primary Language and Linguistic Isolation – English and Spanish are the primary languages in the PSA with 44.5% in the PSA reporting English is not spoken in the home. In areas of Oxnard the English not spoken at home rate jumps to 67.4%.
- Insurance status – 5.8% of the population is uninsured.

The hospital serves an area federally designated as a Medically Unserved Area (MUA). St. John’s Regional Medical Center (SJRMC) is in the 93030 zip code of the service area. Ventura County is also served by: Simi Valley Hospital and Santa Paula Hospital to the north, Los Robles Regional Medical Center and Thousand Oaks Surgery Hospital to the east, and Community Memorial Hospital to the west.

One tool used to assess health need is the Community Need Index (CNI) created and made publicly available by Dignity Health and Truven Health Analytics. The CNI analyzes data at the zip code level on five factors known to contribute or be barriers to health care access: income, culture/language, education, housing status, and insurance coverage. Scores from 1.0 (lowest barriers) to 5.0 (highest barriers) for each factor are averaged to calculate a CNI score for each zip code in the community.
Research has shown that communities with the highest CNI scores experience twice the rate of hospital admissions for ambulatory care sensitive conditions as those with the lowest scores.

NOTE: BASED ON THE COMMUNITY NEEDS INDEX, OXNARD, IN ZIP CODES 93030, 93033 AND 93041 HAVE A MEDIAN SCORE OF 4.2 WHICH FALLS IN THE “HIGHEST NEED” CATEGORY.
COMMUNITY BENEFIT PLANNING PROCESS

The hospital engages in multiple activities to conduct its community benefit and community health improvement planning process. These include, but are not limited to: conducting a Community Health Needs Assessment with community input at least every three years; using five core principles to guide planning and program decisions; measuring and tracking program indicators; and engaging our Community Board Healthy Communities Committee in addition to other stakeholders in the development of the annual community benefit plan.

Community Health Needs Assessment Process

For the purposes of this 2016 report, the needs addressed were from the 2013 SJRMC CHNA which was adopted in January of 2013. The process for the 2013 CHNA sought the broadest participation possible form Ventura County, City of Camarillo and neighboring communities, elected officials, Ventura County health professionals, the various leaders of Ventura County human services organizations—both public and private (who daily serve the needs of the community in various capacities), hospital staff currently involved with community needs and healthcare consumers/community members. Elected/government officials were interviewed in person or by phone. Public and private invitations were sent to organizations that specialized in Human Services to the broad population of both ethnically diverse populations and potential patient/healthcare consumer-type groups for a hearing that was held on May 1, 2012 at St. John’s Regional Medical center. The hearing was chaired by the Vice President of Mission Integration and facilitated/documented by Hospital Community Benefit Staff. In addition health care consumers were selected on a random basis and interviewed as they participated in activities related to maintaining/improving their health.

Historic data was compared to current data to discern trends, with particular concern for the community health impact of the “Great Recession” of 2009. This 2013 CHNA began with a review of the 2009 CHNA. New data sources were identified and utilized, including the Ventura County Health Status report of 2011 in the creation of the 2013 CHNA. Additional data from both hospitals (e.g. discharge information and interviews with medical, executive, social service and Emergency Department staff). A population specific- Latino Community Health Needs Assessment was undertaken in 2014 and recent secondary indicator data for comparisons was also collected from both the State of California and Healthy People 2020.

A group of leaders from St. John’s were assembled to critically examine the data and provide analysis and identify resources available. The assessment took 12 months with various administrative and other meetings and input of leadership from Dignity Health. The 2013 SJRMC CHNA may be found at www.dignityhealth.org/stjohnsregional/document/community-benefit-reports/2013-chna.

2013 CHNA Health Needs Addressed in this 2016 Report

The results of the 2013 CHNA presented a comprehensive picture of the issues facing Ventura County and the SJRMC’s PSA in particular. Healthcare topics such as access to different resources, availability of services, and concerns about costs of services were some of the issues examined to determine the healthcare needs and preferences of Ventura County residents. The 2013 CHNA identified the following top five issues impacting healthcare:
• **Diverse needs from a diverse population** that views/seeks healthcare differently and holds differing expectations regarding care thus impacting care delivery.

• **Lack of Financial Resources** (especially fixed income populations in the PSA) as it affects access to Health care.

• **Chronic Diseases**, including: diabetes, heart failure and other heart diseases, respiratory diseases and cancer, as these diseases present a burden of recurring impact on the utilization of limited healthcare resources.

• **Obesity Rates** in terms of how obesity leads to other medical conditions such as diabetes and heart disease.

• **Mental Health Services** in terms of resources and access for the poor/fixed income population.

• **Environmental issues** that may impact health as a contributing factor in exacerbating medical conditions or, through long term exposure, create a medical condition requiring treatment.

The health needs of the community are found to be extensive and SJRMC’s assets are limited. As a result, certain identified needs were not being addressed or were addressed indirectly such as obesity which is being addressed through a Dignity Health Community Grant. Not being addressed are:

- Mental Health Needs of the Poor—at present SJRMC lacks sufficient resources to address this need.
- Environmental Issues Impacting Health—SJRMC lacks the resources to address these issues in the community. However, the hospital is committed to reducing its own environmental impact in the community.

### 2016 CHNA Health Needs Addressed in this 2017 Plan

The 2016 CHNA, as adopted in June of 2016, was completed through a culmination of primary and secondary data sources. Each data source and the process utilized for assessment and collection is described in the following subsections. To compliment primary data, community health needs survey, key stakeholder focus groups, community leader interviews, secondary data including U.S. Census and well established state and county wide public health was collected and synthesized for this report.

The initial step in conducting the Community Health Needs Assessment was through the development of a health needs assessment survey based on questions from the Centers for Disease Control and Prevention (CDC) Behavioral Risk Factor Surveillance System Survey (BRFSS). The survey collection used a convenience sampling approach where locations were selected to best represent the Oxnard community. Survey responses were analyzed as compared to various independent variables, including place of residence, educational attainment, race/origin, and age.

In addition to our health behavior survey and to supplement the quantitative findings, key informants were invited to participate in a group and/or interview to further assess the underlying drivers for health outcomes, current community efforts, and obstacles to health. Key informant interviews with representation from Ventura County Public Health Department, Oxnard Police Department, Port Hueneme City Council and focus groups with those having special knowledge and whose work focuses on health needs, health disparities, and vulnerable populations, provided vital information that increased the understanding of the health needs of the Oxnard community.
The community stakeholder focus group was held on May 3, 2016 at St. John’s Regional Medical Center. Attending included individuals from community organizations including health professionals, social service providers, and other community leaders. The stakeholder focus group was given a Likert scale survey on the services provided and top health needs in Ventura County.

The 2016 CHNA utilized the following secondary data sources, and where possible, was compared to data collected during the community health survey providing a comparison of service area data to county, state, or national levels:

a) United States Census Bureau
b) Centers for Disease Control and Prevention – Behavioral Risk Factor Surveillance System
c) California Department of Public Health
d) Healthy People 2020
e) Health Matters in Ventura County

Based on the multitude of primary and secondary data sources evaluated and considered, there appears to be no evidence of information gaps that limit the ability of this CHNA to assess the community’s health needs.

**2016 CHNA Significant Health Needs for This Plan**

St. John’s leadership adopted a tiered approach to prioritize identified community health needs as follows:

- **Tier I** community needs are those that are the most urgent and not being addressed due to a lack of community resources to address the need.

- **Tier II** community needs are less urgent but that are not being fully addressed by existing community resources.

- **Tier III** community needs are entrenched or somewhat permanent challenges to good health and somewhat adequately addressed/met by existing community resources.

- **Tier IV** community needs being adequately addressed by existing community resources.

The prioritized health needs from the 2016 CHNA and plans to address those needs are summarized as follows:

**Tier I**—

**Obesity & Overweight** which will be addressed through increased education, especially of youth, to change lifestyle behavior patterns that result in these conditions.

**Access to Health Care** will be addressed by education through health fairs and immunization clinics. Future education will also include information about available insurance, coverage and community resources for the uninsured. The goal is to create a better educated health consumer population so as to achieve Healthy People 2020 access goals. SJRMC will also expand its Emergency Dept. facilities as it increases capacity to serve those in need and there will be at least one community clinic stabled by 2018.

**Homeless Health Issues** will be addressed collaboratively through the local 2016-7 Dignity Health Community Grants program and the Hospital Association of Southern California. The former program has earmarked at least $100,000 to assist a community collaboration in start-up of the respite program(s). The latter has awarded an initial grant to Salvation Army of Ventura County to develop a respite program.
Lack of Mental Health Resources is a need for which SJRMC lacks resources. We look to, and will support where possible, Ventura County Behavioral Health in addressing this need. Future Dignity Health Community Grants (2017 & 2018) are being considered as a resource to initiate a collaborative approach to addressing this need.

**Tier II**

**Diabetes & Prediabetes** will be addressed through greater collaborative education using evidenced based DEEP® (Diabetes Education & Empowerment Program). Sponsored by the Health Services Advisory Group SJRMC was first in the county to offer this program, which shows great promise (in participant enrollment and retention). This program is our first collaboration with Community Memorial Health System staff (one of the educators in the classes held at SJRMC is a CMHS Nurse Supervisor and diabetes CNE).

**Cardiovascular Health** is being addressed through SJRMC with CHAMP® (Congestive Heart Active Management Program) and our “Know Your Numbers” health screening events. Future plans are to increase CHAMP® access by expanding use of this resource through the Dignity Health Medical Foundation and other affiliated providers.

**Cancers** are being addressed through the multiple programs of St. John’s Cancer Center of Ventura County. These include education/prevention seminars and lectures, support groups, a nurse navigator program and a cancer dietician. For 2017 we will introduce mobile skin cancer screenings through our Mobile Wellness Vehicle.

**Tier III**

**Social Determinants of poor health** are being addressed through the SJRMC Health Ministries Program. This national recognized program includes a community food pantry, community clothes closet and basic needs counseling/budgeting education and community loan program (the latter is funded by the St. John’s Foundation). Collaboration with community resources and the Simi Adventist Hospital/Kaiser Veterans program is being explore for possible implementation by FY18.

**Creating the Community Benefit Plan**

As a matter of Dignity Health policy, the hospital’s community health and community benefit programs are guided by five core principles. All of our initiatives relate to one or more of these principles:

- **Focus on Disproportionate Unmet Health-Related Needs:** Seek to address the needs of communities with disproportionate unmet health-related needs.
- **Emphasize Prevention:** Address the underlying causes of persistent health problems through health promotion, disease prevention, and health protection.
- **Contribute to a Seamless Continuum of Care:** Emphasize evidence-based approaches by establishing operational linkages between clinical services and community health improvement activities.
- **Build Community Capacity:** Target charitable resources to mobilize and build the capacity of existing community assets.
- **Demonstrate Collaboration:** Work together with community stakeholders on community health needs assessments, health improvement program planning and delivery to address significant health needs.
Program Design & Implementation Process

Community Health staff explored current resources, including fiscal and personnel limitations (number of staff and education), available off-the-shelf outcomes/evidenced based available programs and community resources/collaborations in determining what programs could best address the needs described above. Planning the programs is taken on as a team under the leadership of Vice President of Mission Integration and Sisters of Mercy Sponsors, and is presented to the Healthy Communities Committee for input and oversight.

Examples of this process:

The Health Services Advisory Group (HSAG) offered to train trainers in the evidenced based DEEP® Diabetes self-management Program. Community Health Education staff explored the program and found the material and approach more engaging than our prior evidence based program. The Community Health Education team was trained and offered one test class in English. Our initial offering of DEEP® was successful and roll-out is now our diabetes education mainstay through 2018 in both Spanish and English. A $5,000 grant is helping to extend this program into the Spanish speaking community.

CHAMP® has been a low labor intensive contracted activity with proven outcomes in empowering those who suffer from Heart Failure in order to avoid unneeded use of healthcare resources. Results continue to show remarkable results, as a result Community Health Leadership in collaboration with the SJRMC Cardiology Committee decided to continue this program through 2018 with expansion to Dignity Health Medical Foundation so those who are within the Dignity Health family of care can benefit from this program.

Addressing Homeless Health needs (HH) is a challenge that is beyond SJRMC’s current resources. Community Health Leadership determined there may be an opportunity to utilize the Dignity Health Community Grants Program to initiate expansion collaborative HH resources. Therefore $100,000 was earmarked this year of the grant award amount to Accountable Care Collaborations to propose viable programs to meet this need.

Access to Healthcare is a need so great that is requires a multi-valent approach. SJRMC Community Health leadership and staff continue to provide education through programs like “Know Your Numbers” (A1C, Blood pressure, heart rate, Body Mass Index—offered quarterly) and health fair screenings & education to create a more knowledgeable health consumer population (in English & Spanish).

A Senior Wellness Program focuses on senior education, activity and health monitoring. Initiated by a Sister Sponsor, and partially grant funded by the City of Oxnard, continues to provide excellent outcomes for participants in health awareness and maintenance. As a result this program will continue and the City of Oxnard will continue to fund and the Boys and Girls Club of Oxnard/Port Hueneme will provide the facilities/location rent free.

Utilization of the SJRMC Emergency Dept. (ED) continues to grow as many health consumers and the uninsured see this as their most accessible form of primary care, therefore SJRMC leadership has embarked on a 5 million expansion of the ED by 2018.

Mother-Infant care is also part of SJRMC’s access strategy, with expansion of our Labor & Delivery facilities and the Neonatal Intensive Care Unit by 2018.
Access also requires going to the health consumer/those in need, as a result SJRMC leadership includes in its strategy a Dignity Health Care Corridor in Ventura County. This will include imaging, physical therapy, women’s centers and at least one off-site community clinic affiliated with Dignity Health by 2018.

Social Determinants of poor health, especially poverty & housing needs, continue to be addressed by Health Ministries. Started by a Sister of Mercy sponsor 20 years ago this program continues to expand, with 25,000 contacts in FY16, dispensing 85 tons of food donated by the Foodshare (the community food distribution bank), USDA and local merchants, and more than 1,000 contacts for basic needs loans are among its activities.

Community Health Leadership strategically is looking to improve the quality of the food distributed not just quantity. National recognition of the program has led to a $20,000 grant to acquire protein. 2016-18 plans are to seek involvement of dieticians and food/meal preparation education of those who are served.

Rent & Utilities loans now include counseling and budgeting education so as not only assist but empower those in need to break the cycle of poverty.

Supporting current staff educational aspirations, Social Worker capabilities is a planned addition by 2017.

Planning for the Uninsured/Underinsured Patient Population
SJRMC seeks to deliver compassionate, high quality, affordable health care and to advocate for those who are poor and disenfranchised. In furtherance of this mission, the hospital offers financial assistance to eligible patients who may not have the financial capacity to pay for medically necessary health care services, and who otherwise may not be able to receive these services. A plain language summary of the hospital’s Financial Assistance Policy is in Appendix C. The amount of financial assistance provided in FY16 is listed in the Economic Value of Community Benefit section of this report.

The hospital notifies and informs patients about the Financial Assistance Policy by offering a paper copy of the plain language summary of the Policy to patients as part of the intake or discharge process. At the time of billing, each patient is offered a conspicuous written notice containing information about the availability of the Policy.

Notice of the financial assistance program is posted in locations visible to the public, including the emergency department, billing office, admissions office, and other areas reasonably calculated to reach people who are most likely to require financial assistance from the hospital. The hospital provides brochures explaining the financial assistance program in registration, admitting, emergency and urgent care areas, and in patient financial services offices.

The Financial Assistance Policy, the Financial Assistance Application, and plain language summary of the Policy are widely available on the hospital’s web site, and paper copies are available upon request and without charge, both by mail and in public locations of the hospital. Written notices, posted signs and brochures are printed and available online in appropriate languages. Our Financial Assistance Policy is posted for the public at http://www.dignityhealth.org/stjohnsregional/patients-and-visitors/patients/billing-and-payment-information/payment-assistance.
2016 REPORT AND 2017 PLAN

This section presents strategies, programs and initiatives the hospital is delivering, funding or on which it is collaborating with others to address significant community health needs. It includes both a report on actions taken in FY16 and planned programs with anticipated impacts and measurable objectives for FY17. Programs that the hospital plans to deliver in 2017 are denoted by *.

The strategy and plan specifies planned activities consistent with the hospital’s mission and capabilities. The hospital may amend the plan as circumstances warrant. For instance, changes in significant community health needs or in community assets and resources directed to those needs may merit refocusing the hospital’s limited resources to best serve the community.

STRATEGY AND PROGRAM PLAN SUMMARY

- **Obesity & Overweight**
  - Increased education, especially of youth, to change life style behavior patterns that result in these conditions*
  - Health Fairs when BMI & Waster Measurement screenings indicate education is appropriate*
  - Senior Wellness & Walking Program

- **Access to Health Care**
  - Health Fairs & Community Screening events, including 1 full service free “medical Camp” and insurance availability education*
  - Mobile Flu Immunization Clinics will be addressed by education through health fairs and immunization clinics*
  - SJRMC will expand its Emergency Dept. facilities
  - Expanding Mother-Infant facilities
  - Integration of Community Health activities that are offered with Dignity Health Medical Foundation and other Physician affiliations*
  - Creation of the Dignity Health Care Corridor in Ventura County
    - Establishing at least one Dignity Health affiliated community clinic

- **Homeless Health Issues**
  - 2016-7Dignity Health Community Grants program* and the Hospital Association of Southern California. The former program has earmarked at least $100,000 to assist a community collaboration in start-up of the respite program(s). The latter has awarded an initial grant to Salvation Army of Ventura County to develop a respite program.

- **Diabetes & Prediabetes**
  - DEEP® (Diabetes Education & Empowerment Program). This program is our first collaboration with Community Memorial Health System staff (one of the educators in the classes held at SJRMC is a CMHS Nurse Supervisor and diabetes CNE)*

- **Cardiovascular Health**
  - CHAMP® (Congestive Heart Active Management Program)*
    - Expanded to include Dignity Health Medical Foundation & other affiliated physician organizations/collaborations*
  - “Know Your Numbers” offered quarterly to the public*
1:1 health education as needed*

- **Cancers**
  - Cancer Center of Ventura County at St. Johns*
    - Education/prevention seminars and lectures
    - Support groups
    - Cancer nurse navigator
    - Cancer dietician specialist services
    - Mobile skin cancer screenings thought our Mobile Wellness Vehicle.

- **Social Determinants of Poor Health**
  - SJRMC Health Ministries Program*
    - Community food pantry
    - Community clothes closet
    - Basic needs financial loan assistance
    - Counseling/budgeting education
    - Social Work assistance
    - Collaboration with community resources and the Simi Adventist Hospital/Kaiser Veterans program is being explore for possible implementation in FY18
    - Financial assistance for uninsured/underinsured and low income residents* -- The hospital provides discounted and free health care to qualified individuals, following Dignity Health’s Financial Assistance Policy.

**Anticipated Impact**

The anticipated impacts of specific, major program initiatives, including goals and objectives, are stated in the program digests on the following pages. Overall, the hospital anticipates that actions taken to address significant health needs will: improve health knowledge, behaviors, and status; increase access to care; and help create conditions that support good health. The hospital is committed to monitoring key initiatives to assess and improve impact. The Healthy Communities Committee, hospital executive leadership, Community Board, and Dignity Health receive and review program updates. The hospital creates and makes public an annual Community Benefit Report and Plan, and evaluates impact and sets priorities for its community health program by conducting Community Health Needs Assessments every three years.

**Planned Collaboration**

During the CHNA process the community health leaders of the not-for profit hospitals in Ventura County (the two St. Johns hospitals, Community Memorial Hospital, Simi Valley Adventist Hospital) and Ventura County Medical Center began meeting with Ventura County Public Health Dept. and the regional leader for Kaiser’s community health programs. From these quarterly meetings we have resolved to collaborate in addressing identified health needs where possible based on unique resources of each facility/organization and pooling other resources. In addition, we look to collaborate to complete a comprehensive CHNA when it is next due for the facilities in 2019.

SJRMC plans to collaborate more with the Dignity Health Medical Foundation in Ventura county and the SCICN-Ventura (Southern California Integrated Care Network—Ventura). This unfolding collaboration will create portals for health consumers to enter the Dignity Health family of care services,
whether physician, hospital or community health event. In entering that portal the planned outcome is for a comprehensive health management of the individual’s needs.

**Program Digests**

The following pages include program digests describing key programs and initiatives that address one or more significant health needs in the most recent CHNA report. The digests include program descriptions and intervention actions, statements of which health needs are being addressed, any planned collaboration, and program goals and measurable objectives.

<td>The Senior Wellness Program has been an integral part of St. John’s Community Health Education Department. The Senior Wellness Program consists of programs that aim to provide seniors with tools to improve their health and wellness. Seniors can participate in the following programs: Energizer’s Walking Program; health related English and Spanish education and support groups; exercise classes; Chronic Disease Self-Management Workshops, six month Living With Diabetes Program; health screenings; adult immunizations and flu shot clinics. Free HbA1C screenings are offered to all participants who have diabetes. All of these services are bilingual and free to the community. St. John's provides coordination, staffing, facilities and funding for most of the programs, but collaborates with other organizations who contribute staff, facilities, publicity and a small amount of funding.</td>

### FY 2016 Report

#### Program Goal / Anticipated Impact
- Monitor and manage hypertension and diabetes among seniors.
- Prevent a medical crisis and hospitalization through early referral and self-management health education.
- Improve health and wellness of seniors through supportive, safe healthy behavior programs.

#### Measurable Objective(s) with Indicator(s)
- 90% of program clients will NOT have a critical value on blood pressure screening.
- 90% of program clients will NOT have a critical value on blood sugar screening.
- Participants will display a 5% increase in knowledge at health and disease management classes as demonstrated in pre and post-tests.
- 75% of Walking Program participants with diabetes will achieve an HbA1C level below 7.0% by the end of the year.
- Offer two Chronic Disease Self-Management Workshops.

#### Baseline / Needs Summary
To improve and maintain their health, the senior population needs health knowledge and skills, as well as assistance in managing chronic illnesses and maintaining good health. Some need safe, supervised programs for physical activity. There is a need for preventive health management and services to reduce medical crisis, complications and hospitalizations. Diverse populations require programs designed based on their language, socio-economic and educational needs.

#### Intervention Actions for Achieving Goal
- Utilize 2016 Community Needs Assessment to plan, organize and coordinate.
- Increased outreach to DUHN communities.
- Develop programs for clients to improve their health knowledge/skills and behaviors to manage their health and chronic illnesses and improve their health.
- Implement and evaluate effectiveness of senior wellness programs.

#### Program Performance / Outcome FY 2015
- 99.6% of program clients did NOT have a critical value on blood pressure level (above 180/110) out of 1,901 blood pressure checks.
- 0.3% (5) of program patients had a critical value on blood sugar levels (above 300 mg/dl) out of 1,452 blood sugar checks.
- Senior Wellness Program participants displayed a 26.5% increase of knowledge of health and disease management as demonstrated in pre and post-tests.
- 82% of Walking Program participants with diabetes achieved an HbA1C of 7% or less by the end of the fiscal year.
- 3 Spanish Tomando Control Classes and 2 English Chronic Disease Self-Management classes were offered.

#### Hospital’s Contribution / Program Expense
Support for this program is included in St. John’s operational budget. St. John’s offers free use of hospital conference rooms to collaborators and the cost is applied to community benefit. St. John’s Hospitals’ volunteers collaborate with the community health education department staff to offer free health screenings, health information and immunizations, and assist with other aspects of the Senior Wellness Program.

### FY 2017 Plan

#### 2016 CHNA Significant Health Needs Addressed
- **✓** Significant Health Need: Obesity & Overweight
- **✓** Significant Health Need: Diabetes and Prediabetes
- **✓** Significant Health Need: Cardiovascular Health
- **✓** Significant Health Need: Access to Health Care

<tr>
<td>According to the 2016 Community Health Needs Assessment Heart disease is among the top five leading causes of death and most costly health problems in the United States. Heart disease can cause severe illness and disability and decreased quality of life. However, Heart Disease is also among the most preventable conditions. Heart Failure (HF) is one of the chronic heart diseases identified as the most common reason for hospitalization among the elderly, accounting for one-fifth of all admissions. Consequently, Medicare beneficiaries with HF are among the most costly to Medicare; they represent 14% of the population, but account for 43% of Medicare Part A and B spending. This Chronic Disease Management Program is open to all community members with heart failure including the poor and underserved at no cost to all participants.</td>

Community Health Needs Assessment that indicates heart disease is a main reason for emergency department visits and one of the top causes of death.

**Intervention Actions for Achieving Goal**

- Utilize the 2016 Community Health Needs Assessment to develop health plan to decrease impact of heart disease within our communities, with special focus on those with heart failure.
- Provide on-going education for staff and healthcare providers about the value of the HF Program.
- Work with the Mercy Health & Vascular Institute to provided consistent telephone follow-up and education to all patients enrolled in CHAMP®.
- Cardiovascular team will conduct regular meetings to identify strategies to increase program enrollment.
- Identify HF program candidates and refer to the appropriate program level.
- Provide discharge planning, HF symptom management education, home health service evaluation and referral to the appropriate resources.
- Provide follow-up visits, assessments and education to HF participants with the collaboration of Home Health agencies as available.
- Refer and enroll patients to Living Well: Chronic Disease Self-Management Program and the new Diabetes Empowerment Educational Program.
- Refer and enroll patients as appropriate to Hello Health Living Well with Diabetes, a diabetes self-management program.
- Refer and enroll patients as appropriate to cholesterol classes.
- Refer and enroll clients in Diabetes Support Group
- Assess and evaluate interventions created to improve the participants’ knowledge, skills and behaviors to manage their health and chronic conditions.

**Program Performance / Outcomes for FY2016**

- 98.64% of the participants enrolled in CHAMP® were not re-admitted to any hospital or emergency department within 90 days.
- 157 community participants were enrolled in CHAMP®.
- St. John’s Case Managers provided initial evaluation, and referral to local county medical facilities (including clinics) when indicated for those recruited within St John’s Hospitals.

<tr>
<td>According to the March 2016 UCLA Center for Health Policy Brief, 46% of all adults in California “are estimated to have prediabetes or undiagnosed diabetes. An additional 2.5 million adults have diagnosed diabetes. Altogether, 15.5 million adults (55 percent of all California adults) have prediabetes or diabetes. Although rates of prediabetes increase with age, rates are also high among young adults, with one-third of those ages 18-39 having prediabetes. In addition, rates of prediabetes are disproportionately high among young adults of color, with more than one-third of Latino, Pacific Islander, American Indian, African-American, and multiracial Californians ages 18-39 estimated to have prediabetes.” The 2013 Latino Community Health Needs Assessment reports 73.5% of the population in Oxnard self-identified as Hispanic/Latino and 67% of the population in Oxnard reported they do not speak English at home in addition to 40% of participants reporting not having health insurance. The 2016 Community Health Needs Assessment reported 18% of survey respondents have diabetes and 5.3% have diagnosed prediabetes. Chronic disease is prevalent among the primary needs within our community. Diabetes type II is at high risk for under diagnosed and/or under treated among the Latino Hispanic population of our community. This program is targeted primarily to the poor and underserved. It reaches the</td>
</tr>
</tbody>
</table>
working poor with no insurance and the Latino population by providing access to free or very low cost healthcare services for low income underinsured children and adults, and offer preventative health education to the community.

**Program Description**
The St John’s Mobile Health Screenings and the Flu Vaccination Clinic is a portable program targeting children and adults in Ventura County targeting primarily the poor and underserved, the working poor with no insurance and the Latino population. The mobile unit targets locations in areas of greatest need as identified in the 2013 *Latino Community Health Needs Assessment*, are accessible to those least likely to receive health screenings and immunizations from mainstream health care including:
- Non-English proficient
- Migrant/transient
- Uninsured/under-insured
- Limited transportation
- Large families

**Planned Collaboration**
Local Physicians, Public Health, Community Health Care Agencies, Navi-Health, Community Health and Faith Community Nurses, Local Faith Communities, Schools, Health Care Providers

**Community Benefit Category**
- A1-a Community Health Education-Group Health Education
- A1-b Community Health Education-Individual Health Education
- A1-d Community Health Education-Support Services
- A2-d Community Based Clinical Services- Immunizations/Screenings

**FY 2016 Report**

**Program Goal / Anticipated Impact**
- Improve immunization rates for children and adults within our community.
- Improve school readiness for children through prevention, vaccinations, and early interventions.
- Improve early recognition and awareness of chronic disease sign, symptoms and risks among the adult, young adult and teenager population served with prevention, early detection, early interventions and increased immunization rates.
- Seek grant funding for continuation and growth of Shots for Kids and Adults and St John’s Mobile health Screenings services including increased staff and clinic operational needs.
- Increase partnerships for provision of mobile health screenings and education for community partners, school districts, migrant programs, family resource centers, local parishes, immunization clinics and for the newborn population
- Increase education and awareness on the importance of health screenings and immunizations to all populations served

**Measurable Objective(s) with Indicator(s)**
1. Increased number of children and adults receiving health screenings.
2. Increased number of children and adults receiving immunizations.
3. Increased number of community events.
4. Increased grant dollars secured for Mobile Health Screenings unit and Shots for Kids and Adults program.
5. Increased number of persons getting health education

**Baseline / Needs Summary**
FY2016:
- Performed 44 immunization clinics
• Provided 1829 immunizations on adults (1733 flu vaccines)
• Provided 567 immunizations on children (400 flu vaccines)
• Provided 109 Tuberculin (PPD) tests.
• 2376 adults and children were educated on the immunization side effects, risks and importance of adherence to immunization schedule.
• Performed 20 mobile health screening events
• 1086 people were seen free of charge for health screenings on the St John’s Mobile Unit (360 males; 723 females; 1023 adults; 63 children)
• Provided 844 Body Mass Index screenings with 442 referrals (154 males; 281 females, 7 children)
• Provided 581 Waist Circumference Screenings with 339 referrals (77 males; 258 females)
• Provided 967 Blood Pressure Screenings with 295 referrals (120 males; 175 females)
• Provided 1050 Blood Glucose screenings with 277 referrals (41 males; 232 females; 4 children)
• Provided individual education to 1086 children and adults

Intervention Actions for Achieving Goal

Implementation strategies for FY2017 are:
1. Increase participation at our regularly scheduled Community Health Fairs and Shots for Kids and Adults Clinics in order to provide more residents with access to a model continuum of care.
2. Enhance our work with other health care entities to implement a model continuum of care.
3. Increase utilization of our wellness programs to create improved mechanisms that will enhance follow-up, and retention of participants.
4. Continue to provide health related services, education for diabetes and other chronic conditions, health screening testing to uninsured/underinsured populations at no cost to the patient in the health fairs and mobile screenings unit or in the hospital, and free or low cost immunizations to children and adults.

for women, children, adults and families, especially those living in poverty, and other vulnerable populations.

- Educate health professionals on the importance of shared vision and collaboration to reduce health care disparities within our community while addressing root causes of health problems such as poverty, homelessness and environmental hazards.
- Advance increased general knowledge
- Improve access to affordable health care services
- Enhance Population Health especially those at-risk populations such as underinsured and uninsured persons.
- Increase the community’s capacity to promote the health and well-being of its residents by offering the expertise and resources of medical professionals in these health events.
### Diabetes Program (DEEP®)

|------------------------------------|------------------|---------------------|----------------------------|-----------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------|
| ☑ Significant Health Need: Obesity & Overweight | ☑ Focus on Disproportionate Unmet Health-Related Needs | A six session class to educate and empower those with diabetes or prediabetes so that they and their families can control their disease process to the extent that they arrest diabetes or prevent further deterioration of their health. | A1-a Community Health Education – Lectures/Workshops  
A1-c Community Health Education – Individual Health Education  
A1-e Community Health Education - Self-help | Program Goal / Anticipated Impact: Those that complete the classes will be empowered to control their diabetes and avoid unnecessary use of medical resources. 
Measurable Objective(s) with Indicator(s): Pre-test vs post-test of participants will show a 50% increase in knowledge. Class attendance erosion will be less than 80% 
Intervention Actions for Achieving Goal: Offer at least 4 classes in English and 4 in Spanish  
Six session per class, attendees must complete 5 of 6 sessions  
Multi-media and hands on education with live Q&A tailored to each participant. 
Planned Collaboration: One of the Bi-lingual Instructors is an nurse educator employee of Community Memorial Health System |

Vance Kalcic MD – Chief of Staff
Ann Kelly MD – Oncologist/Hematologist
Tom Laubacher – Laubacher Insurance
Darren Lee – CEO, St. John’s Hospitals (ex officio)
Laura McAvoy – Attorney
Henry Montes MD – Oncologist, Radiation Oncology Medical Group
Sandy Nirenberg – Executive Director, Camarillo Hospice
Sr. Joan Marie O’Donnell RSM – Sister Sponsor
Michael Powers – Ventura County Executive Officer
Billie Jo Rodriguez – Chair of St. John’s Healthcare Foundation (ex officio)
Donald Skinner – Retired President, Zebra Technologies
Carl Wesley – Retired President Wesley Thomas Construction (Community Board Chair)
George Yu MD – Pulmonologist

Community Board Healthy Communities Committee:
Carl Wesley, Chair
Joe Hernandez
Sandi Nirenberg
Sergio Magdaleno RN – Community Member
Colleen Nevins – Dir. Of Nursing Program at California State University Channel Islands
George West – Vice President Mission Integration St. John’s Hospitals (ex officio)
Gabriel Guillen – Supervisor St. John’s Community Health Education Dept. (ex officio)
Lydia Kreil – Supervisor, St. John’s Health Ministry Dept. (ex officio)
Isabel Nunez – Community Health Educator, St. John’s Hospitals (ex officio)
APPENDIX B: OTHER PROGRAMS AND NON-QUANTIFIABLE BENEFITS

The hospital delivers a number of community programs and non-quantifiable benefits in addition to those described elsewhere in this report. Like those programs and initiatives, the ones below are a reflection of the hospital’s mission and its commitment to improving community health and well-being.

Through the Dignity Health Community Grants Program a $75,000 grant was awarded a $75,000 grant to an Accountable Care Community Collaboration to address obesity by providing education and counseling. Although goals were achieved in terms of the number of clients seen the quantifiable benefit cannot be determined.

The Cancer Center of Ventura County at St. John’s is another ministry that cannot quantify its outcomes because its purpose is support. Support of those diagnosed with cancer, their families, survivors and those who have suffered a loss. The work of support in FY 16 though was exceptional:

- Exercise Class contacts 778
- Cancer Information contacts 1,387
- Free mammograms & Ultrasounds 162
- Cancer nutrition Counseling 1,035
- Cancer Nurse Navigator clients 379
- Relaxation Therapy 690
- Support Group Counseling 1,090

This ministry provides valuable free services to those who are dealing with life threatening disease. And, though it may not have direct correlation to cancer survival, it does provide necessary support not otherwise available, offering hope and Humankindness®.

As healthcare turns its focus on population health the social determinants of poor health are becoming a focus. St. Johns has had a program to address social determinants for over 31 years—started by a Sister of Mercy who saw the community need. Today the Health Ministry program operate a Community Food Pantry, Community Clothes Closet and a Basic Needs financial assistance program. It is difficult to quantify the outcomes of this ministry because the support focuses on needs not easily tracked. Its interventions are as follows:

Health Ministry Dept. population served:
- 94% Hispanic, 3.1% White, 1.2% Asian, 1.5% African American, 0.1 % Other.
- 11% are between the ages of 0 - 4 years old
- 16% are between the ages of 5 - 10 years old
- 12% are between the ages of 11 - 15 years old
- 7% are between 16 - 18 years old
- 49% are between the ages of 19 - 59 years old
- 5% are 60+ years old

Food Pantry contacts & distribution:
- 5,164 people or 1,526 families served (unduplicated contacts)
• 16,100 hot meals distributed.
• Distributed 121,940 lbs. (71 TONS) of food from Food Share orders and USDA commodities.
• The total contacts (duplicated) at the Food Pantry in FY16 = 25,356.

Health Ministries Basic Needs:

• Served 1,811 with clothing needs.
• 565 pairs of shoes were collected in our First Shoe Drive during Christmas.
• 574 people received community referrals to local agencies.
• 898 single adult bus passes and 14 multiple ride bus cards for Gold Coast Transit were distributed, showing an increase of 33% more bus passes.
• 489 people benefited from SJ Financial Assistance Program.
• $23,247.43 was given ‘loans’ to low income clients to cover the following needs:
  o Rent = $11,772.00/ 237 people served
  o Utilities = $7,269.27 / 208 people served
  o Emergency Lodging = $760.80 / 9 people served
  o Prescriptions = $598.36 / 4 people served
  o Miscellaneous = $2,847.00 / 31 people served

Health Ministry Funding:

• Staff salaries are budgeted in Hospital Operations.
• St. John’s Healthcare Foundation restricted fund provided $35,019.53 in order to cover food and supply expenses, plus provide financial assistance for basic needs.
• $1,387.00 was deposited to St. John’s Healthcare Foundation from loan repayments by clients, representing 6% of the assistance given to community members.
• Received $20,000.00, from Raskob Catholic Activities through the St. John’s Healthcare Foundation to purchase protein products for St. John’s Food Pantry.

This extraordinary, nationally recognized, program cannot by itself solve the problem presented by the social determinants of poor health, it does serve locally to assist those who are currently experiencing those socio-economic limitations.

St. John’s Hospitals offer opportunities for health care profession education to the following organizations/institutions:
• California State University Channel Islands (Nursing)
• Oxnard College (LVN training)
• Ventura College (Nursing & CNA)
• Center for Employment Training (medical assistant and front office)
• C.O.P.E Health Scholars (internships for those exploring careers in health)
• PathPoint Services (developmentally challenged citizens training)

These programs offer supervised exposure and training to potential future healthcare workers and those enrolled in a program that leads to a health career. The benefits to the community of providing more
trained health care professionals (or in the case of PathPoint—an opportunity to learn a rewarding trade) is significant but cannot be quantified.

St. John’s has an active Ecology Program. That program has improved recycling and reduced land-fill trash significantly. The program has also moved to install charging stations at both facilities and ensures that replacement equipment has a less of an environmental footprint. While these activities cannot be quantified they fulfill our responsibility to be a good steward of the environment and a good neighbor to our community.

The Healthy Beginnings Department (HB) at St. John’s focuses on underserved pregnant women in our community to improve the health of the mother and the infant. Outcomes were as follows:

- Enrolled 71 pregnant women in the program.
- 16% more clients joined Healthy Beginnings in the second trimester compared to last year.
- The amount of clients joining Healthy Beginnings in the last trimester was reduced by 18%.
- 40% of the clients that delivered this year had a normal pre-pregnancy weight, which shows a 16% increase compared to last year.
- 23% of the clients that delivered this year were overweight before they got pregnant. That shows a reduction of 12% compared to the cases closed last year.
- A reduction of 5% in obese pre-pregnancy weight was recorded for the clients enrolled in the program compared to last year.
- 94% of HB clients had an initial MD visit in the first trimester of their pregnancy.
- 92% of the clients enrolled in the program delivered at St. John’s.

This California CPSP program focuses on bringing healthy babies into the world and avoiding Gestational Diabetes Mellitus by opening doors that might otherwise be shut and providing education and support.
APPENDIX C: FINANCIAL ASSISTANCE POLICY SUMMARY

Dignity Health’s Financial Assistance Policy describes the financial assistance programs available to uninsured or under-insured patients who meet certain income requirements to help pay for medically necessary hospital services provided by Dignity Health. An uninsured patient is someone who does not have health coverage, whether through private insurance or a government program, and who does not have the right to be reimbursed by anyone else for their hospital bills. An underinsured patient is someone who has health coverage, but who has large hospital bills that are not fully covered by their insurance.

Free Care
• If you are uninsured or underinsured with a family income of up to 200% of the Federal Poverty Level you may be eligible to receive hospital services at no cost to you.

Discounted Care
• If you are uninsured or underinsured with an annual family income between 200-350% of the Federal Poverty level, you may be eligible to have your bills for hospital services reduced to the highest amount reasonably expected to be paid by a government payer, which is usually the amount that Medicare would pay for the same services.
• If you are uninsured or underinsured with an annual family income between 350-500% of the Federal Poverty level you may be eligible to have your bills for hospital services reduced to the Amount Generally Billed, which is an amount set under federal law that reflects the amount that would have been paid to the hospital by private health insurers and Medicare (including co-pays and deductibles) for the medically necessary services.

If you are eligible for financial assistance under our Financial Assistance Policy you will not be required to pay more than the Amount Generally Billed described above. If you qualify, you may also request an interest-free extended payment plan.

You will never be required to make advance payment or other payment arrangements in order to receive emergency services.

Free copies of the hospital’s Financial Assistance Policy and financial assistance application forms are available online at your hospital’s website listed below or at the hospital Admitting areas located near the main entrance. (Follow the signs to “Admitting” or “Registration”). Copies of these documents can also be mailed to you upon request if you call Patient Financial Services at the telephone number listed below for your hospital.

Traducción disponible: You may also obtain Spanish and other language translations of these documents at your hospital’s website, in your hospital’s Admitting area, or by calling your hospital’s telephone number.

Dignity Health Financial Counselors are available to answer questions, provide information about our Financial Assistance Policy and help guide you through the financial assistance application process. Our staff is located in the hospital’s Admitting area and can be reached at the telephone number listed below for your hospital.
