

First Teeth First

Dental Screening and Fluoride Events

What it is:

Registered Dental Hygienists (RDH) can see all babies and kids up to 5 years old—from a gum check, first teeth, to all 20 primary teeth. Our team of experienced dental professionals come to your site.

What to Expect:

- The team brings all supplies, including the goody bags for each child to take home after.
- Paper consent forms are brought to you 2 weeks before the scheduled event, allowing enough time for each parent to complete a consent form.
- How long will it take? If you have a childcare center, it will be from 8:00 AM to 11:30 AM. We are flexible for other centers.
- Ages 3, 4, and 5 will be able to participate in the fun education presentation about Oral Health.
- Parents are contacted as needed after the event to coordinate needed care.
