

Breathe easy, Arizona.

Celebrating 1,000 lung transplants and 1,000 minimally invasive robotic surgeries

At Norton Thoracic Institute, we understand that chronic illness affects more than your health. It affects your life. Our team of experts specializes in the diagnosis and treatment of pulmonary issues, including COVID-19. When your daily activities are affected by an ongoing health condition, our real specialty is helping you get back to all the everyday moments that bring your life joy.

Our reputation for tackling the most complex and most difficult thoracic diseases with excellence and innovation empowers us to breathe life into lives everyday.

World leaders

Home to one of the largest lung transplant centers in the country. We are now #3 nationally in lung transplant volume.

Post-COVID treatment

Innovative resources for the treatment of post-COVID lung disease.

Award-winning

Certified by the American Association of Cardiovascular and Pulmonary Rehabilitation (AACVPR).

Our state-of-the-art facilities allow us to offer both medical and surgical treatment options for our patients while providing personalized, patient-driven, compassionate care.
