

# Sequoia Hospital Guest House COVID-19 Safety Guidelines

Dignity Health Sequoia Hospital's top priority is keeping our patients, visitors and community safe and healthy.

Since there might be more than one family staying at the guest house at the same time, we ask our guests to follow these safety guidelines:

- Wear a mask in indoor common areas when there are guests from outside your household present.
- Label food in the refrigerator, and only touch your food.
- If eating at the dining table with guests from other households, sit 6 feet apart.
- When sharing the common areas, please wipe down high-touch surfaces (e.g., tables, counters, handles/knobs, remotes).

Thank you for your understanding and cooperation as we work to keep our community safe.
