

How to Order Timed Lab Tests

For “timed labs,” the following order entry fields must be addressed:

- **Date/Time:** Enter the date and time of the first lab to be drawn
NOTE: For additional lab timed series ordered that need to correlate with any current lab timed series order. The *date and time* must reflect when the first lab needs to be drawn.
- **Collection Priority:** Timed
NOTE: If *Timed* is not selected, it **will not** show up on the phlebotomist’s dashboard on the actual collection time. Routine-Next Collection cannot be used or it will auto cancel the order.
- **Duration:** Enter a duration number
NOTE: Duration and Duration Unit are correlated together (i.e. 3 days)
- **Duration Unit:** Select the duration unit

Duration unit:	Day	▼
	(None)	
	hr	
	min	
	Week	
	Day	
	Dose/Time	

- **Frequency:** Select a frequency “interval” (i.e. q12hr (interval))
NOTE: By selecting, a frequency “interval” lab will know these are specific collection times.

	(None)	^
	once	
	q12hr	
	q12hr (interval)	
	q12week	
	q16week	
	q1hr	
	q24h (interval)	
	q25week	
	q2day	
	q2h (interval)	
	q2week	▼
Frequency:	q12hr(interval)	▼

How to Order Timed Lab Tests

- Label Comments:** If further instructions is needed or need emphasis on the order (i.e. Lab series timed draws every 4 hours for 2 days)
