Intuitive Collage is just that: a collage of what you envision your life to be. Any and all aspects of life can be examined and new insights and motivations gained. Through the simple act of cutting and pasting images and words, the subconscious presents itself.

Relaxing in a stress-free atmosphere will allow you to listen to your heart and face hidden fears that are holding you back. Let go, embrace new ideas, find your passion!

Using colorful pictures and meaningful words and phrases that appeal to you in a personal way, you will explore ideas and dreams. Your collage will speak, inspire and motivate you in creative ways.

Gift yourself with an hour and a half of rest and reflection. See what your creative spirit unleashes through the power of visioning collage.

Kathleen McKinnon, M.Ed.
Facilitator

A teacher, artist and cancer survivor, Kathleen is the creator of “Hope Gives Us Wings”—an art installation of life-size angel wings that gracefully adorns the HCRC Multipurpose Room. She has a PhD in life and uses her life experiences to help others heal and grow through creative expression.
