Mercy Orthopedic,
Spine & Hand Center

Dr. Timothy Galan, M.D.

Orthopedic Joint & Revision Surgeon

Dr. Galan is a fellowship trained orthopedic surgeon specializing in an array of minimally invasive techniques in joint replacement, preservation and revision.

He has had comprehensive training in the field of adult orthopedic joint reconstruction. Prior to medical school, Dr. Galan worked as a nurse for four and half years. Dr. Galan obtained his post graduate education at the University of California San Francisco Fresno where he completed his orthopedic surgery residency. It was at UCSF Fresno where Dr. Galan served as the orthopedic surgery Chief of Trauma. He participates in several ongoing research studies on the evaluation and treatment of total joint replacements of the hip and knee and is credited in several peer review publications.

Education and Accomplishments:

- **Rochester Community and Technical College, Rochester, MN**
– Associates of Science Nursing
- **University of Minnesota Medical School, Minneapolis, MN** –
Doctor of Medicine
- **University of California San Francisco, Fresno Program, Fresno CA** – Orthopedic Surgery Residency
- **Mayo Clinic Jacksonville** – Adult Reconstruction Fellowship
- **American College of Surgeons** – Resident Member
- **American Academy of Orthopedic Surgeons** – Resident Member
- **American Association of Hip & Knee Surgeons** – Candidate Member

After completing his orthopedic surgery residency, Dr. Galan went on to complete his adult reconstruction fellowship at the world renowned Mayo Clinic in Jacksonville Florida where he studied complex total joint reconstruction and revision surgery.

Dr. Galan is new to the Bakersfield community and enjoys sports, travelling, community involvement, and spending time with his family. He also enjoys learning about history, different cultures, cuisines, and art. He is looking forward to providing comprehensive orthopedic care alongside his colleagues at the Mercy Orthopedic, Spine & Hand Center.

Specialties:

- Hip and knee arthroplasty (Total Joint Replacement), featuring robotics and navigation techniques
