

Family Caregiver Support Program Seeking Volunteers

Dignity Health has developed a Family Caregiver Program that supports caregivers in our community. We have identified a specific need for respite volunteers for those family members providing care to loved ones who have Alzheimer's or other Dementia related illnesses. We are looking for interested volunteers to join this meaningful effort. This volunteer program, through Dignity Health Hospice, will provide training and support needed for volunteers to work with this special population.

You, as a volunteer, may be the only relief for that family member to get out to exercise, go to a movie, a doctor appointment or church. Our current service area is the Northern Santa Barbara County and will grow to San Luis Obispo County in the future.

Training will include strategies and techniques of working with Alzheimer's patients. Other volunteer criteria will be required such as a background check and orientation.

If you are interested in volunteering for this new program or for more information, please contact Christine Meugniot, Dignity Health Hospice at 805.614.2061 or email Christine.meugniot@dignityhealth.org
