St. Mary's Medical Center

Cardiology Research Program

St. Mary's Medical Center in San Francisco, part of the Dignity Health system, provides a comprehensive and collaborative approach to diagnosis and treatment of cardiovascular disease and is nationally recognized for its commitment to exceptional care. An important part of that commitment includes ongoing leadership in the field of cardiovascular research.

The physicians and staff of the St. Mary's Medical Center are focused on identifying new technology, procedures and devices that will positively impact our patients, improving their symptoms, their prognosis and their quality of life.

About the Program

St. Mary's Medical Center is proud to be a part of multiple multi-center, national and international clinical research trials. The program is led by dedicated physicians and professional research staff. This team actively participates in numerous National Institutes of Health studies and industry sponsored trials.

The mission of the cardiology research program is to support continued innovation in the field of cardiovascular care, with the goal of finding new ways to provide timely and effective treatment to patients diagnosed with cardiovascular disease.

About Dignity Health Research Institute

At Dignity Health, we strongly believe in the benefits of clinical research and are committed to leading the way in the advancement and use of new and evolving technology and procedures. Our vast research program speaks to this commitment.

Dignity Health as a system offers more than 1,000 active clinical trials and research protocols to its patients in Arizona, California and Nevada.

Dignity Health Research Institute for California & Nevada provides centralized research administration infrastructure and support including contracting, budgeting, financial management and IRB oversight for all research sites across our California & Nevada markets.
