Target Audience: Medical Staff involved with the care of trauma patients

Learning Objectives: The participant should be able to:

1. Identify current and recent trends in the care of traumatic injuries
2. Describe treatment options for specific traumatic injuries seen in our patient population
3. Analyze how treatment modalities at St. Mary compare to national trends and those presented in recent research studies.
4. Evaluate practice changes that may be implemented based on current research and evidence-based practice.
5. Appraise how changes can be made to current guidelines and practice to align with national standards.
