

A B O U T

A HERITAGE OF QUALITY PATIENT CARE AND COMPASSION

The modern-day St. Bernardine Medical Center is a direct reflection of the mission and values established by the Sisters of Charity of the Incarnate Word of Houston, Texas, when they founded the hospital in 1931.

A highly regarded 463-bed nonprofit acute-care hospital, St. Bernardine provides quality care of body, mind and spirit, delivered by an innovative team of skilled professionals.

The Medical Center's patients benefit from a balance of leading-edge technology, the most advanced techniques and responsive, compassionate care delivered with dignity and respect for the individual.

EXPERIENCE COUNTS

St. Bernardine Medical Center is among the largest hospitals in the Inland Empire, offering a full continuum of services, from family care to the most advanced heart surgery. Each year the hospital treats 70,500 patients in the Emergency Department, delivers over 2,100 babies, performs over 700 open-heart surgeries and admits more than 17,000 patients for treatment.

As the community has grown and medical care has evolved, St. Bernardine has expanded to meet the need. A multi-million dollar investment over the last decade has provided crucial facility upgrades to offer patients the latest digital diagnostics and the most advanced procedures. A highly sophisticated center for the critically ill was added, along with many other upgrades, including the latest catheterization labs and equipment for heart and vascular treatment, an endovascular hybrid surgical suite, and an outpatient center for imaging, with the latest mammography and stereotactic breast biopsy services.

AFFILIATIONS

St. Bernardine Medical Center is a member of Dignity Health, the largest nonprofit health care delivery system in the western United States. The hospital is a contracted provider with most major health insurance plans.

LICENSES AND ACCREDITATIONS

- Licensed by the State of California as an acute care general hospital.

OUTREACH SERVICES

As part of St. Bernardine's mission, the hospital offers a wide array of free and low-cost information, programs and opportunities, including physician referral, education and support groups. Noteworthy specialty programs include:

Baby & Family Center: Located on the hospital campus, this Center offers a nurturing environment and caring staff focused on promoting family health and well-being and improved access to care. Services help prepare, educate and support the community, with programs ranging from prenatal education to breast-feeding assistance, from chronic disease self-management to citizenship classes.

Family Focus Center: Located across from San Bernardino High School, the Center provides healthy alternatives for at-risk youth and their families. The opportunities available include a "Late Night Hoops" basketball league, summer camp, after-school mentoring and tutoring, as well as literacy, violence prevention and career development programs.

Stepping Stones: This hospital-based program offers career exploration through a resource center and mentoring opportunities, and enables high school and college students, along with other young adults, to volunteer in a hospital setting.
